START PROCEDURE

There are going to be no set start times, and starts will be done at 30s intervals to account for the reduced start window.

TERRAIN INFORMATION

Following a survey of the competition area, we are happy with the safety of the terrain. There is some minor vegetation on the ground across the campus but nothing that could pose a danger to competitors.

Building works are occurring to the south-west of the campus, and the map has been updated to reflect this as accurately as possible. Whilst courses have been planned so there should be no need to enter areas where work is occurring, competitors are reminded to stay out of restricted areas.
